JUST COOKERHOODS

Il calore della fusione genera l’acciaio, materia prima delle nostre cappe.
Il calore del fuoco della cottura genera vapori e odori, che le nostre cappe eliminano.
Il calore della nostra passione ha generato una collezione completa di prodotti che presentiamo con questo catalogo.

Buona lettura.

falmec
JUST COOKERHOODS

Heat from fusion generates steel, the raw material used for our hoods.
Heat from cooking generates steam and odours, removed by our hoods.
Heat from our passion has generated a complete collection of products that we are presenting in this catalogue.

Happy reading.

MISSION

REALIZZARE ESCLUSIVAMENTE CAPPE PER CUCINA IN MODO DA CONCENTRARE IL PROPRIO KNOW-HOW TECNOLOGICO IN UN'UNICA AREA SPECIALISTICA E GIUNGERE COSÌ A RISULTATI DI ECCELLENZA.

Just Cookerhoods

EXCLUSIVELY CREATING COOKER HOODS TO CONCENTRATE TECHNOLOGICAL KNOW-HOW IN A UNIQUE AND SPECIALIST AREA AND THEREBY ACHIEVE EXCELLENT RESULTS.

VISION

VOCAZIONE PER LA QUALITÀ

OGNI DETTAGLIO, IN TUTTE LE FASI DEL PROCESSO PRODUTTIVO, È DA TENERE SOTTO CONTROLLO.
OGNI SINGOLA LAVORAZIONE È FRUTTO DI STUDI, RICERCHE E VERIFICHE PREVENTIVE, DI GRANDE ATTENZIONE AI DETTAGLI COSTRUTTIVI, DI PRECISIONE MANUALE, DI AUTOMAZIONE AI MASSIMI LIVELLI.

A VOCATION FOR QUALITY

EVERY DETAIL, IN THE ENTIRE PRODUCTION PROCESS, SHOULD BE KEPT UNDER CONTROL.
EVERY SINGLE PROCESS IS THE RESULT OF RESEARCH, DESIGN AND PREVENTION CONTROLS, ABSOLUTE ATTENTION TO MANUFACTURING DETAILS, MANUAL PRECISION AND OPTIMAL LEVELS OF AUTOMATION.

GREEN DEAL

PRESERVARE L'AMBIENTE E RENDERLO MIGLIORE.

FIN DALLA SUA NASCITA, 30 ANNI FA, FALMEC HA CERCATO UNA VIA RESPONSABILE E RISPETTOSA PER CONCILIARE PRODUZIONE E ATTENZIONE ALLE RISORSE, MERCATO E SOSTENIBILITÀ.
NEL CORSO DEL TEMPO HA CREATO PASSO DOPO PASSO UN SUO CODICE, REGOLATO LE SUE ATTIVITÀ, AFFINATO GLI ATTEGGIAMENTI.
QUESTI PRINCIPI E QUESTO IMPEGNO LO HA CHIAMATO GREEN DEAL, PERCHÉ COSTITUISCE UN PATTO CON CUI FALMEC TRASFERISCE NEI SUOI PRODOTTI E DUNQUE, AI LORO UTILIZZATORI, QUESTE ATTENZIONI E SENSIBILITÀ.

PRESERVING AND IMPROVING THE ENVIRONMENT.

SINCE ITS FOUNDATION 30 YEARS AGO, FALMEC HAS ALWAYS SOUGHT A RESPONSIBLE AND RESPECTFUL MEANS OF BALANCING PRODUCTION AND ATTENTION TO RESOURCES, THE MARKET AND SUSTAINABILITY.
OVER THE YEARS, IT CREATED ITS OWN CODE, TIME AND TIME AGAIN, ADJUSTING ITS BUSINESS AND REFINING ITS APPROACH. THESE PRINCIPLES AND THIS COMMITMENT IS CALLED GREEN DEAL, BECAUSE IT FORMS A PACT WHEREBY FALMEC TRANSMITS SUCH ATTENTION AND SENSITIVITY TO ITS PRODUCTS AND THEREFORE, ITS CUSTOMERS.

Le cappe falmec rappresentano un vertice assoluto per funzionalità, resa, durata nel tempo.

Garantiscono all'ambiente un'aria pulita, sempre perfettamente depurata da odori e vapori.

Con un design che arreda lo spazio cucina in sintonia con le tendenze dello stile contemporaneo.

Falmec: un'azienda di uomini per aggiungere qualità, comfort e piacere alla vita di altri uomini.

Falmec hoods represent top of the range functionality, performance and duration over time.

They guarantee clean air in the environment, always perfectly purifying odours and steam.

Designs that decorate kitchens with contemporary style trends.

Falmec: a company of people providing quality, comfort and pleasant living to others.

HUMAN
INSIDE

TAGLIO LASER
Prima fase della lavorazione è il taglio della materia prima.
Eseguita con macchinari all'avanguardia garantisce la costanza nella qualità di tutte le successive fasi di lavorazione. La qualità del prodotto finale non può infatti prescindere dalle lavorazioni a valle, prima fra tutte il taglio laser della materia prima.

PIEGATURA
Anche la successiva fase di piegatura avviene con macchinari altamente automatizzati che oltre alla precisione garantiscono un'alta flessibilità produttiva.

VERNICIATURA
La verniciatura a polveri epossidiche è utilizzata per le scocche esterne delle cappe classiche e per difendere le componenti interne dalla corrosione e dal tempo. Questo tipo di tecnologia, rispettosa dell'ambiente, consente infatti di rendere resistenti alla ruggine le parti non in acciaio e di rendere le stesse facilmente pulibili.

LASER CUTTING
The first processing phase is raw material cutting conducted using state of the art machinery that guarantees constant quality in all subsequent processing phases. The quality of the end product cannot in fact disregard the downstream processes, first of all laser cutting of the raw materials.

BENDING
The subsequent bending phase is also conducted on highly automated machinery that other than their precision also guarantees highly flexible production.

PAINTING
Epoxy powder painting is used for the external casing of classic hoods and to defend internal parts from corrosion and time. This type of technology, compared to the environment, makes the non-steel parts rust resistant and allows for easy cleaning.

ASSEMBLAGGIO
Anche la fase di assemblaggio è eseguita internamente per completare la catena della qualità e garantire un prodotto all'altezza delle aspettative.
Alla fine di questa fase tutti i prodotti vengono testati verificando il corretto funzionamento di tutte le componenti estetiche e meccaniche.
Un attento controllo visivo viene effettuato per garantire anche l'assenza di difetti estetici.

CONTROLLI
Tutte le pulsantiere sono assemblate internamente a partire da componentistica italiana ed europea.
Anche in questo caso vengono eseguiti attenti controlli qualitativi prima di procedere all'assemblaggio dei prodotti finiti.

MOTORI
Tutti i motori sono realizzati su progetti interni e sviluppati con l'ausilio delle competenze dei fornitori e di esperti in fluidodinamica.
Il risultato è un motore tangenziale con una buona pressione, ottimi livelli di portata e una buona qualità acustica. I motori tangenziali si distinguono da quelli elicoidali per la pressione che i primi riescono ad avere e la loro conseguente capacità di funzionare anche con tubature particolarmente lunghe.

ASSEMBLY
The assembly phase is also internally conducted to complete the quality chain and guarantee a product that meets expectations.
The end of this phase sees all the products tested to check all parts are working correctly, both aesthetically and mechanically. The careful visual inspection conducted also guarantees the absence of any aesthetic defects.

CONTROLS
All the controls are assembled internally using Italian and European parts. Also in this case, careful quality controls are conducted before proceeding with assembly of the end products.

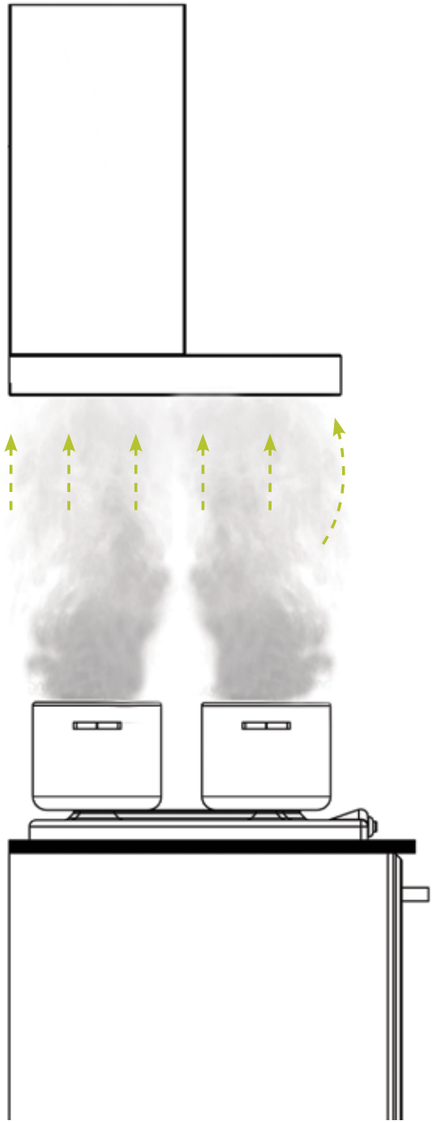
MOTORS
All the motors are manufactured based on internal projects and developed with the help of skilled suppliers and experts in fluid dynamics.
The result is a tangential motor with good pressure, excellent capacity levels and good quality acoustics.
Tangential motors are distinguished from helical motors due to the pressure the first manage to have and their capacity to also work with particularly long tubes.

UNA CAPPA AL TOP DI GAMMA PREVEDE LA SCELTA DEI MATERIALI MIGLIORI COME DURATA, IGIENE ED ESTETICA.
PER LE SUE CAPPE D'ARREDO FALMEC SELEZIONA E UTILIZZA L'ACCIAIO INOX AISI 304, CON UNA LEGA AL 18% DI CROMO E ALL'8% DI NICHEL.
IGIENICO, FACILE DA PULIRE, RESISTENTISSIMO ALLA CORROSIONE È SENZ'ALTRO IL MATERIALE MIGLIORE PER L'IMPIEGO IN AMBIENTE CUCINA.
ALCUNI MODELLI UTILIZZANO ANCHE L'AISI 304 CON FINITURA LUCIDA A SPECCHIO, UNA PARTICOLARE LAVORAZIONE CHE RENDE L'ACCIAIO ANCOR PIÙ BRILLANTE E PREZIOSO.

A TOP OF THE RANGE HOOD INCLUDES A SELECTION OF THE BEST MATERIALS IN TERMS OF DURATION, HYGIENE AND AESTHETICS.
FOR ITS DECORATIVE HOODS FALMEC SELECTS AND USES AISI 304 STAINLESS STEEL, WITH AN ALLOY OF 18% CHROME AND 8% NICKEL.
HYGIENIC, EASY TO CLEAN, HIGHLY RESISTANT TO CORROSION, IT IS WITHOUT DOUBT THE BEST MATERIAL TO USE IN ANY KITCHEN.
SOME MODELS ALSO USE AISI 304 WITH A SHINY, REFLECTIVE FINISH, A PARTICULAR PROCESS THAT MAKES THEM EVEN SHINIER AND PRECIOUS.

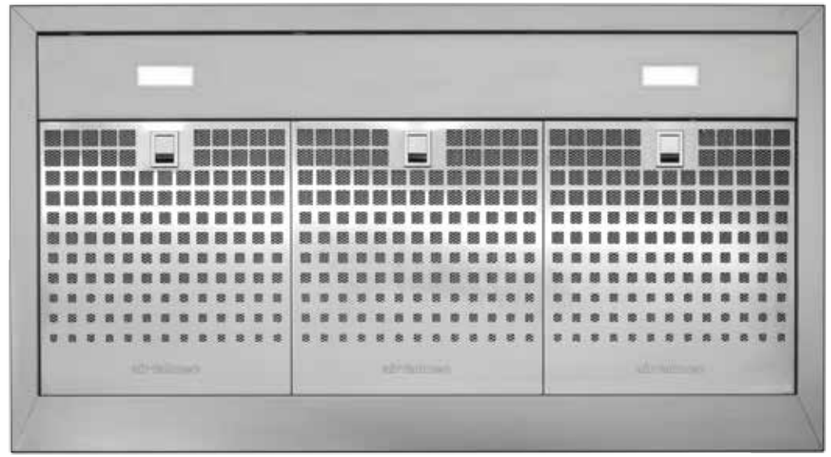
Acciaio Aisi 304

air falmec
ASPIRAZIONE BILANCIATA
balanced suction

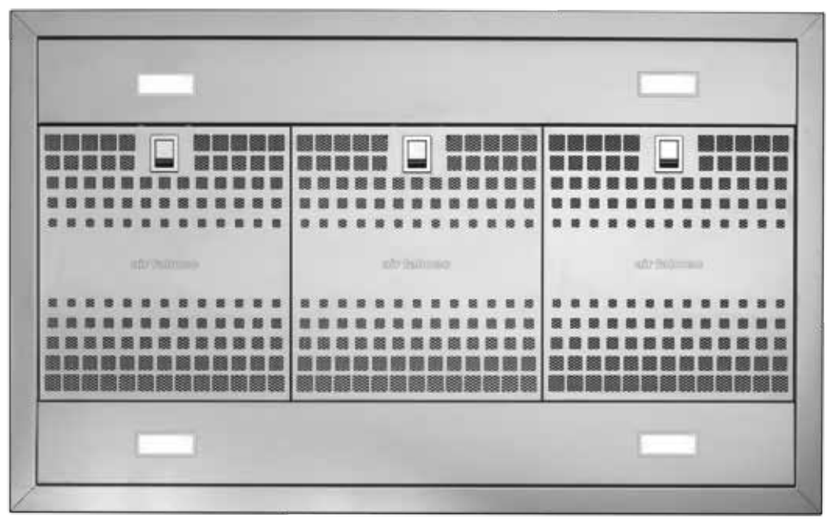


Pressione e velocità dell'aria nella parte aspirante della cappa sono naturalmente maggiori nelle aree vicine al motore. E' evidente infatti che la capacità di aspirazione sarà più concentrata nella parte centrale, appunto sotto il motore aspirante.
Tale sbilanciamento comporta una perdita generale dell'efficacia della cappa specie nelle sue parti più periferiche. **Airfalmec**, il nuovo sistema di filtri bilanciati in acciaio, consente di superare questo limite andando a redistribuire l'aspirazione per una massima efficienza ed una migliore capacità della cappa anche negli angoli più lontani per aspirare al meglio tutti i fumi e vapori della cottura.

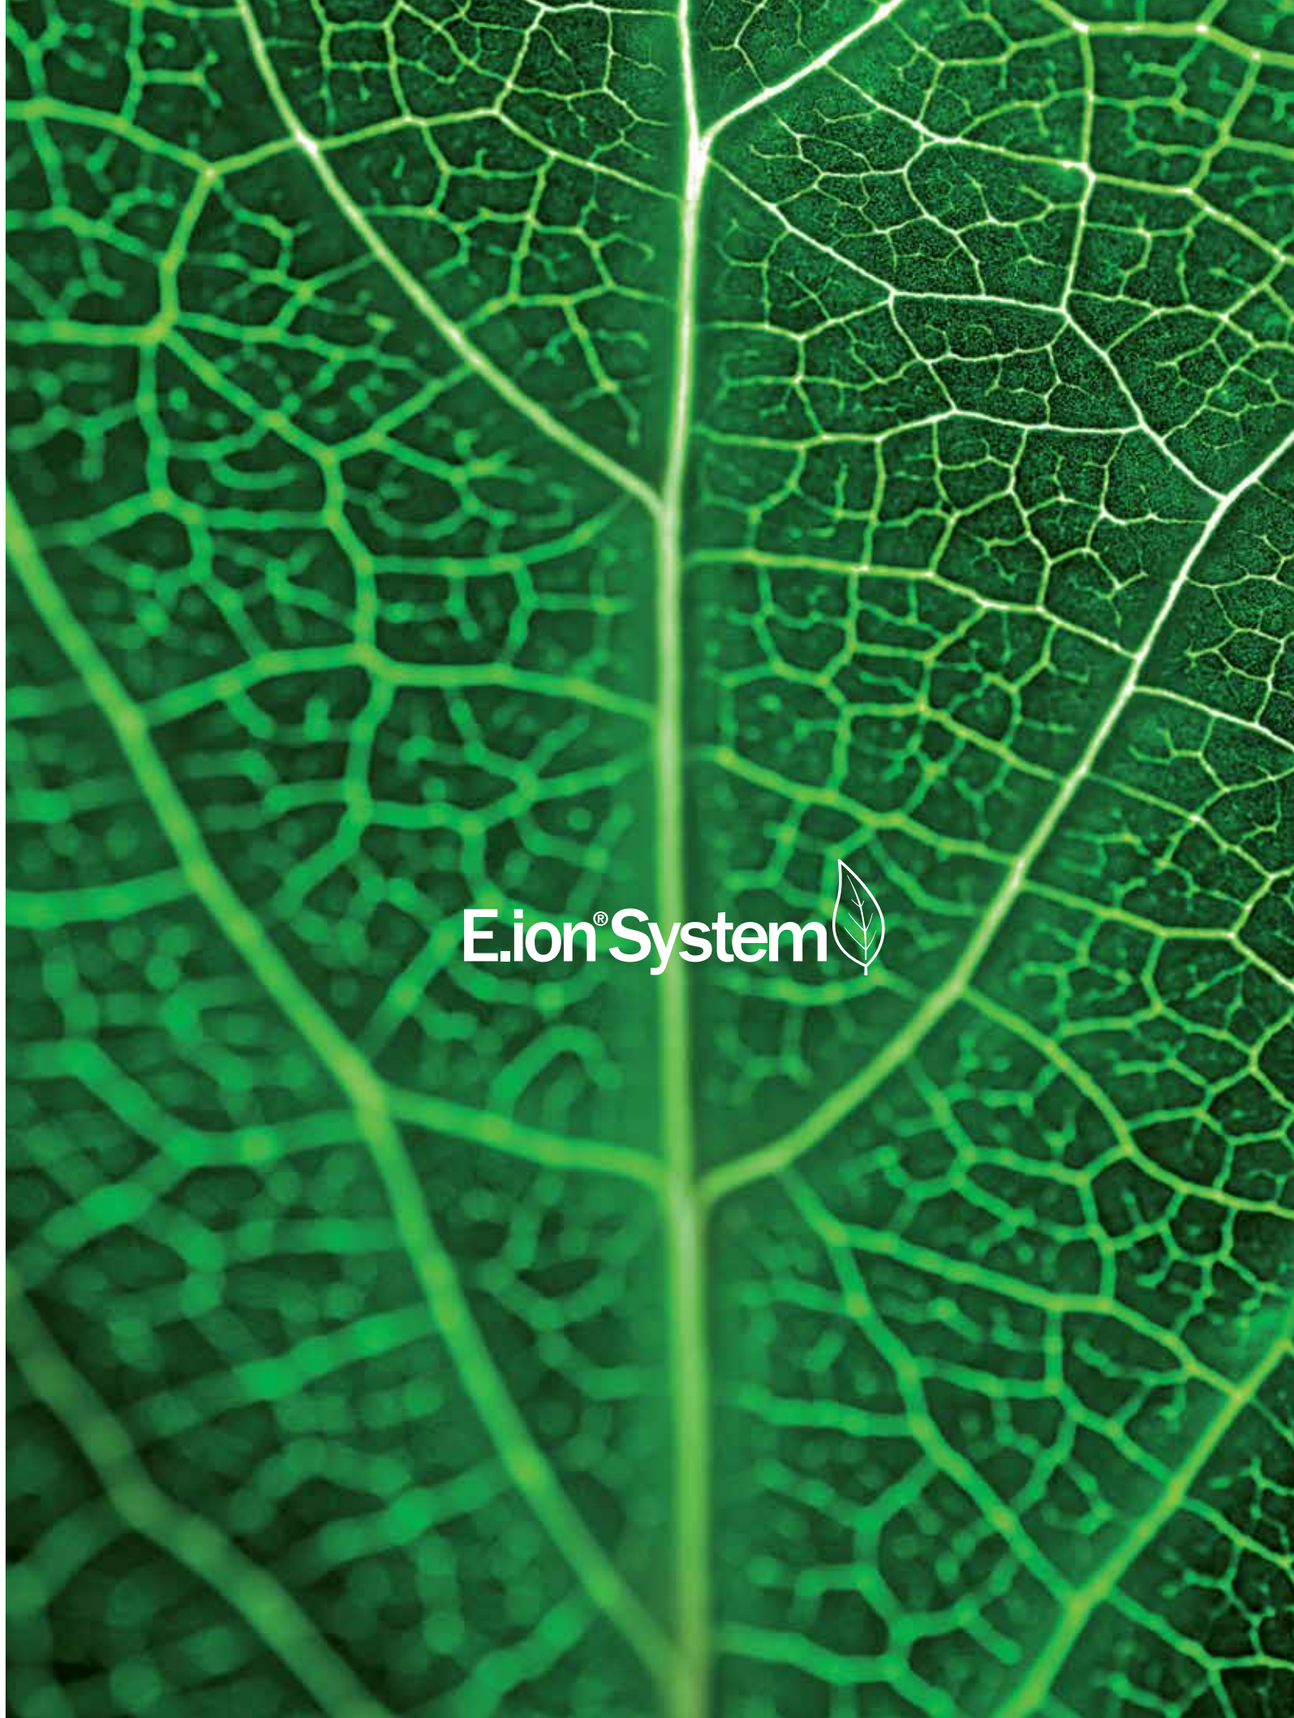
Pressure and air velocity in the suction side of the hood are naturally higher in areas close to the motor.
As a result, suction capacity is concentrated directly under the motor, leading to a general loss of performance, especially in the filter peripheral area.
Airfalmec, the new balanced filter system, features a new design that can overcome this limitation by redistributing the aspiration for maximum efficiency and a greater capacity of the extractor, even in the furthest corners of the hood.



PARETE/WALL



ISOLA/ISLAND



Just Cookerhoods

FABBRICA DI ARIA PURA

Oggi Falmec propone una nuova tecnologia applicata alle sue cappe che consente di ricreare, mediante la tecnologia della IONIZZAZIONE BIPOLARE CONTROLLATA*, ioni atmosferici che non solo abbattono gli odori sgradevoli ma ristabiliscono l'equilibrio ionico ottimale negli ambienti di vita, con notevole giovamento per il benessere e la salute dell'uomo.
L'azione prodotta dagli ioni è quella di neutralizzare tutti gli agenti inquinanti presenti nell'aria come batteri, virus, acari, polline, spore, polveri varie, cattivi odori, fumo di sigarette, gas di scarico, e purificarla, sanificarla, renderla ottimale.

* Tecnologia tutelata da Brevetto Internazionale

Today Falmec offers a new technology applied to its hoods which allows atmospheric ions to be recreated – through BIPOLAR CONTROLLED IONISATION technology*, ions which not only decrease unpleasant odours, but also re-establish optimum ionic balance in the living environment, with significant benefit to human wellness and health.
The action produced by the ions is one that neutralises all the polluting agents in the air such as bacteria, viruses, dust mites, pollen, spores, various dusts, foul odours, cigarette smoke, exhaust fumes and purifies, sanitises and optimises it.

* Technology protected by International Patent

E.ion® System

PURE AIR FACTORY

NESSUNA EMISSIONE ESTERNA

L'espulsione verso l'esterno dell'aria viziata comporta una evidente dispersione di calore durante l'inverno e di aria condizionata fresca in estate: è evidente il risparmio energetico se si paragona E.ion® System con una cappa tradizionale, che, a massimo regime, può aspirare sino a 800 m^3/h e che può ricambiare l'aria in cucina sino a 25 volte in un'ora*.

*simulazione considerando una cucina media di 4 x 3 x 2,7 = 32,4 m^3 con motore di 800 m^3/h 800 ÷ 32,4 = 24,69 ricambi aria/h

NESSUNA EMISSIONE ESTERNA

The expulsion towards the outside of stale air results in an evident dispersion of heat in the winter, and of cool conditioned air in the summer: the energy savings are clear if we compare E.ion® System to a traditional hood which, when running at full power, can take in air at up to 800 m^3/h and can change the air in a kitchen up to 25 times in an hour*.

*simulated considering a medium size kitchen of 4x 3 x 2.7 = 32.4 m^3 with an 800 m^3/h motor 800 ÷ 32.4 = 24.69 air exchanges/h

È FINITA L'ERA DEI TUBI

E.ion® System consente l'eliminazione di tubazioni per l'evacuazione dei fumi ed odori eliminando tutti i vincoli architettonici.
Le conseguenze sono decisamente positive: non c'è più la necessità di lavori di muratura, di adattamenti di nessun tipo, di risolvere problematiche tecniche di installazione.
E finisce anche l'era dei costi aggiuntivi!

THE TUBE ERA IS OVER

E.ion® System allows us to do away with smoke and odour exhaust tubes, eliminating all architectural restrictions.
The consequences are decidedly positive: no more need for masonry works or any type of adaptation and solving technical installation problems.
And the era of additional costs is also over!

La cappa non ha più vincoli: liberiamo la creatività

La totale libertà di posizionamento della cappa all'interno dell'ambiente cucina rende possibile ogni soluzione progettuale in termini di dislocazione dell'area funzionale della cottura e quindi di arredo.
L'impatto estetico se ne avvantaggia e tutto diventa misura delle esigenze individuali.

The hood has no more restrictions we free creativity

The total freedom of positioning the hood in the kitchen environment makes any design solution possible in terms of displacement of the operational cooking area and therefore the furnishings.
The aesthetic impact is benefited and everything becomes tailor fit for individual needs.

Riduzione degli odori oltre il 70%

More than 70% reduction of odours

NON EMETTE OZONO
NO OZONE EMISSIONS

Il processo di produzione e diffusione nell'aria di ioni che si verifica in natura ad opera di cascate, onde marine, fulmini e che si percepisce nell'aria pura di alta montagna viene ottenuto da Falmec attraverso un campo elettrico bipolare applicato al flusso d'aria generato dalla cappa.
In particolare la ionizzazione consente di abbattere gli odori in cucina tramite l'eliminazione delle molecole organiche sospese nell'aria. **Neutralizza i composti organici volatili trasformandoli in CO_2 ed acqua; inattiva virus, batteri ed allergeni mediante la rottura delle loro membrane esterne, inattiva muffe, funghi e spore, neutralizza il fumo di tabacco, abbatte il particolato.**
La funzione di ionizzazione può essere attivata anche indipendentemente dalla necessità di abbattere gli odori prodotti dalla cottura dei cibi, per ottenere una purificazione e sanificazione dell'ambiente.
L'aria sarà pulita e salubre, senza dover utilizzare prodotti chimici o tecnologia UV.
L'utilizzo della ionizzazione bipolare controllata non comporta alcuna diffusione di ozono nell'ambiente domestico.

The process of production and distribution into the air of ions that occurs in nature in waterfalls, sea waves and lightning, and which is perceived in the pure air of tall mountains, is obtained by Falmec through a bipolar electrical field applied to the air flow generated by the hood.
In particular, the ionization permits a decrease of odours in the kitchen through the elimination of the organic molecules suspended in the air.
It neutralises the volatile organic composites, transforming them into CO_2 and water; it inactivates viruses, bacteria and allergens by breaking their external membrane, it inactivates moulds, fungi and spores, it neutralises tobacco smoke and lowers particulate matter. The ionization function can also be activated independently of the need to lower odours produced by cooking of foods in order to obtain purification and sanitising of the environment. The air will be clean and healthy, without having to utilise chemicals or UV technology. The use of controlled bipolar ionisation does not imply any spreading of ozone into the domestic environment.

BREVETTI

La tecnologia bipolare controllata ed il suo adattamento ai sistemi di aspirazione sono tutelati da brevetti Internazionali.

PATENTS

The controlled bipolar technology and its adaptation to intake systems is protected by international patents.

LOD
LABORATORIO OLFATTOMETRIA DINAMICA

L'odore è una sensazione soggettiva, recepita in modo diverso da ogni individuo, sia per quanto riguarda l'intensità che la qualità dello stimolo olfattivo. Falmec per testare l'efficacia del sistema di ionizzazione ha scelto lo strumento considerato più valido per la quantificazione degli odori.

Sono stati effettuati studi e test presso il Laboratorio Olfattometria Dinamica (LOD), ente di analisi e ricerca delle Università di Udine e Milano, seguendo la norma UNI 13725:2004. Abbiamo effettuato delle analisi su diverse tipologie di cibi e cotture prelevando i differenti campioni di aria. **Ne è emerso che l'utilizzo del sistema ionizzante consente un abbattimento degli odori superiore al 70% con punte fino al 95% nelle condizioni più favorevoli.**

Odour is a subjective sense, perceived differently for each individual, both with regard to intensity and quality of the olfactory stimulus. In order to test the efficiency of the ionisation system, Falmec chose the instrument which is considered the most valid for odour quantification.

Studies and tests were conducted at the (LOD) Dynamic Olfactometry Laboratory, an analysis and research agency at the University of Udine and Milan, following standard UNI 13725:2004.
We conducted analysis on various types of foods and cooking, taking the different air samples. **It came out that the use of the ionizing system allows a decrease of odours greater than 70% with peaks of up to 95% in the most favourable conditions.**

IL BENESSERE E NELL'ARIA

The wellness is in the Air

E.ion® System

Gli ioni sono chiamati anche "vitamina dell'aria" grazie agli effetti benefici che producono sia sulla qualità dell'aria, eliminando gli agenti inquinanti, sia sull'energia e sul benessere delle persone e degli altri esseri viventi (piante ed animali).
In particolare hanno un effetto sulla biochimica umana, determinando un miglioramento dell'umore, della concentrazione e altri importanti vantaggi per la salute. Sono molecole inodori, insapori, invisibili che inaliamo in abbondanza negli ambienti naturali: una volta che raggiungono il nostro sangue, gli ioni producono reazioni biochimiche che aumentano i livelli di serotonina (conosciuta anche come "la chimica dell'umore") contribuendo ad alleviare la depressione, superare lo stress e rafforzare la nostra energia durante il giorno. Quando l'aria contiene una bassa concentrazione di ioni viceversa possono comparire sintomi quali sonnolenza, vertigini, emicrania, depressione e mancanza di respiro.

Ions are also called the "vitamins of the air", thanks to the beneficial effects that they produce on both the air quality, eliminating polluting agents, and on the energy and wellness of humans and other life (plants and animals).
In particular they have an effect on human biochemistry, causing improved moods, concentration and other important health advantages.
They are odourless, tasteless and invisible molecules that we inhale abundantly in natural environments: once they reach our blood, ions produce biochemical reactions which increase serotonin levels (also known as "the mood chemical"), contributing to relieving depression, getting over stress and increasing our energy during the day.
When there is a low concentration of ions in the air, on the other hand, symptoms can occur such as drowsiness, dizziness, migraines, depression and shortness of breath.

CARBON.ZEO
IL FILTRO COMBINATO.
CARBON.ZEO
THE COMBINED FILTER.

CARBONE.
CHARCOAL.

I carboni attivi sono dei materiali, contenenti principalmente carbonio sottoforma di microcristalli di grafite, trattati in modo da ottenere una struttura porosa con una vasta area superficiale interna. Grazie a queste caratteristiche essi hanno grandi capacità assorbenti essendo in grado di trattenere molti tipi di sostanze, attraendo le molecole nella loro superficie interna.

The active material is carbon, which is mainly in the form of graphite microcrystals. These are treated in order to obtain a porous structure with a large internal surface area. Thanks to these characteristics it has a high absorbent capacity, being able to hold the molecules of many types of substances on its inner surface.

ZEOLITE.
ZEOLITE.

La zeolite è un minerale ad elevata microporosità, ricercato per le proprietà d'assorbimento di composti organici e vapore acqueo. Le proprietà delle zeoliti derivano direttamente dalle caratteristiche particolari delle loro strutture cristalline regolari e microporose, caratterizzate da un enorme quantità di volumi vuoti interni ai cristalli.

Zeolite is a mineral with high microporosity. It is sought for its ability to absorb organic compounds and water vapor. This is due to the particular characterisitics of their regular and microporous crystalline structure; the crystals have a large amount of empty space.

L'utilizzo combinato del carbone e della zeolite in un unico sistema di filtri consente un'ottima filtrazione ed incrementa ulteriormente le capacità di purificazione di E.ion® System. Carbon.zeo è quindi il nuovo filtro combinato installato in tutti i prodotti E.ion® System.

The combined use of coal and zeolite in a single system of filters allows for good filtration and increases the purification capacity of the E.ion® System.
Carbon.zeo is this combination, used in the new filter installed in all products of the E.ion® System.

MANUTENZIONE E PULIZIA.

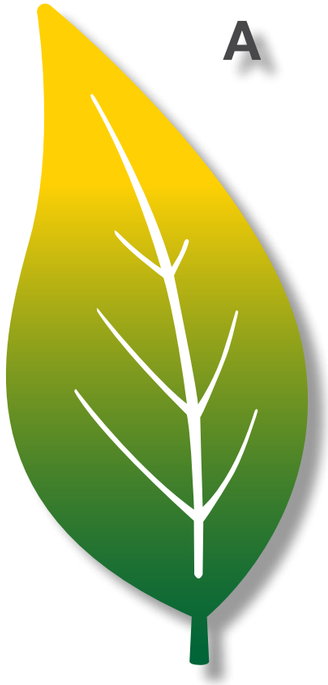
I filtri Carbon.Zeo non necessitano di particolare manutenzione. In condizione di normale uso si consiglia di rigenerarli ogni 18 mesi e di sostituirli dopo 3 anni.
Per rigenerare il filtro Carbon.Zeo inserirlo in un normale forno domestico ad una temperatura di 200° per circa 2 ore.

MAINTENANCE AND CLEANING.

Carbon.Zeo filters do not require special maintenance. Under conditions of normal use you should regenerate them every 18 months and replace them after 3 years.
To regenerate the Carbon.Zeo filter insert it into a normal domestic oven at a temperature of 200° for around 2 hours.

La metamorfosi dell'Aria

The metamorphosis is in the Air



SENSORE FOGLIA.
LEAF SENSOR.

Il sensore presente nei prodotti E.ion® rileva la presenza di composti organici volatili (VOC), gas odorosi, formaldeide, fumo di sigaretta, ammoniaca e tutti gli agenti inquinanti che sono presenti nell'aria: risulta quindi un ottimo indicatore per misurare la variazione della qualità dell'aria domestica. Queste informazioni sono tradotte nella colorazione della foglia che gradualmente da gialla diviene verde al migliorare delle condizioni. Abbiamo implementato un'ulteriore funzionalità che ottimizza le potenzialità della ionizzazione. Grazie alla modalità automatica qualora il sensore rilevi un peggioramento della qualità dell'ambiente domestico, la cappa si attiverà purificando e sanificando l'aria fino a ristabilire l'originario equilibrio.

The sensor in the E.ion® products detects the presence of volatile organic composites (VOC), odorous gases, formaldehyde, cigarette smoke, ammonia and all polluting agents that are in the air. This is therefore an excellent indicator to measure the variation of domestic air quality.
This information is translated into the leaf colour which gradually turns from yellow to green as the conditions improve.
We implemented yet another feature which optimizes the potential of the ionization.
Thanks to the automatic mode, if the sensor detects a drop in the domestic environmental air quality, the hood activates, purifying and sanitizing the air untilthe original balance is re-established.

Ceramica fatta a mano

Ceramic handmade

La realizzazione artigianale del rivestimento delle cappe in gres rende ogni manufatto un pezzo unico perché nessuno potrà essere esattamente uguale all'altro.
Piccole imperfezioni ed irregolarità non sono difetti ma la conferma di questa produzione speciale.Il processo di lavorazione prevede un primo passaggio in forno a circa 1300°, la verniciatura ed una successiva cottura.
Questo rende il rivestimento ceramico della cappa impermeabile ed inscalfibile, per una bellezza inalterata nel tempo.

The handmade production of this hood makes the product unique. Small differences and irregularities are not a defect but the confirmation of its craft way of doing. Its production starts with the cooking in an oven at about 1300°, then the painting of the external surface that makes the ceramic coating waterproof and scratch-resistant, for a unchanged beauty.

Just Cookerhoods

Tecnologia NRS®
per una silenziosità unica

Technology NRS®
for a unique quiteness

Falmec ricerca continuamente soluzioni e tecnologie che riducano la rumorosità dei prodotti e l'inquinamento acustico. Più efficienza, miglior impiego di potenza, meno rumore e minori consumi: l'equazione Falmec produce sempre risultati positivi.
Il nuovo Progetto NRS®, acronimo di Noise Reduction System (Sistema di Riduzione del Rumore), sviluppato da Falmec in collaborazione con laboratori specializzati in studi sulla fluidodinamica e nell'applicazione di materiali fonoassorbenti ci ha permesso di raggiungere risultati impensabili fino ad oggi.
In particolare lo studio della fluidodinamica, eseguito con software altamente innovativi applicati al prodotto cappa ed al suo sistema di aspirazione, ci ha fatto raggiungere una ottimizzazione dei flussi dell'aria eliminando ogni tipo di turbolenze e resistenze, causa principale della rumorosità.
Inoltre l'utilizzo di nuovi materiali studiati per poter contenere la naturale rumorosità prodotta dal semplice movimento dell'aria, ci permettono di ottenere un ulteriore abbattimento dell'inquinamento acustico per il massimo benessere in cucina.
Tutto questo ci legittima a dichiarare di avere le cappe PIÙ SILENZIOSE AL MONDO.

Falmec continually seeks solutions and technologies to reduce the noise produced by their products. More efficiency, better use of power, less noise and lower fuel consumption: the equation Falmec always produces positive results.
The new NRS® project has been developed by Falmec in collaboration with laboratories that specialise in the study of airflow dynamics. This collaboration, alongside the use of sound absorbing materials, has achieved results almost unimaginable until now.
The dynamics of the airflow being drawn through the hood was studied using innovative computer software; this allowed Falmec to develop the products so that airflow is optimised, eliminating any resistance, the principal cause of noise in extraction.
Falmec also invested time and resources in the development of new materials that would be best suited to this particular application because of their sound absorbing qualities.
These materials have been designed to contain any noise produced by the movement of air, further increasing the reductions in noise already achieved by the optimisation of airflow. All of this means Falmec can say they have the QUIETEST COOKER HOODS IN THE WORLD.

CARATTERISTICHE TECNICHE
Technical features

Rispetto ad una comune cappa aspirante presente sul mercato, la rumorosità è stata abbattuta drasticamente. Il beneficio in cucina risulta straordinario.

Compared to today's standard hoods, the noise level has been reduced dramatically.
The benefit in the kitchen is extraordinary.

La percezione della rumorosità segue infatti una scala logaritmica, secondo la quale ad ogni diminuzione di 1db corrisponde una riduzione della rumorosità pari a circa il 20% o, in altri termini, ad ogni diminuzione pari a 3db la rumorosità si dimezza.

The 'perception' of noise follows a logarithmic scale: each decrease of 1dB corresponds to a reduction in the perceived noise level of about 20%. In other words, for every decrease of 3dB perceived noise is halved.

Il silenzio che chiede di essere ascoltato

The silence that demands to be heard

Finalmente una cappa che non si sente.
Con l'innovativa tecnologia NRS® Falmec è riuscita a creare un prodotto che coniuga le elevate prestazioni con il vero comfort domestico.
Al di là dei numeri scientifici che certificano gli ottimi risultati raggiunti, quello che è importante dire è che praticamente la cappa non si sente più.
Si potrà quindi cucinare, lavorare, parlare, ascoltare musica e fare tutto quello che si può fare in cucina senza il rumore tipico di questi elettrodomestici e nella più totale efficacia ed efficienza dell'aspirazione; per una cucina, semplicemente più vivibile. Perché in questo caso la vera innovazione è far sparire qualcosa: il rumore della cappa.

Finally, a cooker hood that cannot be heard.
With the innovative NRS® technology Falmec has created a product that combines high performance with absolute domestic comfort.
Aside from the science, what is ultimately important is that the hood is no longer heard.
You can then cook, work, talk, listen to music and do all you can do in the kitchen without the usual noise of an extractor but in the comfort of a high performance appliance.
Because in this case, the real innovation is to make something disappear: the noise of the hood.

CARATTERISTICHE TECNICHE
Technical features

- Filtro carbone lavabile e riutilizzabile
- Elevata capacità filtrante pari al 75%
- Con un utilizzo normale il filtro va riattivato ogni tre mesi
- Il nuovo filtro carbone ha una durata con un normale utilizzo di tre anni dopo i quali va sostituito
- Maniglia metallica
- Cornice e filtro metallico in alluminio

- Charcoal filter washable and reusable
- 75% filtration capacity
- With normal use, the filters need to be 'reactivated' every three months
- The lifespan of this filter is approximately three years, after this time it is suggested that it is replaced
- Metallic handle
- Aluminium frame and inner layers

COME RIATTIVARLO
Lavare in lavastoviglie utilizzando un normale detergente ad una temperatura non superiore a 65 °C e possibilmente da solo. Dopo il lavaggio riattivare il filtro in forno ad una temperatura di 100 °C per dieci minuti.

HOW TO REACTIVATE IT
Wash the new high performance filter in the dishwasher with a gentle cleaning soap and temperatures no higher than 65C. It is better to wash the filter on its own. After washing reactivate the filter by warming it in the oven at 100C for ten minutes.

Filtro Carbone ad elevato potere filtrante

High performance Charcoal Filter

Il sistema NRS® per la riduzione della rumorosità ottiene i migliori risultati attraverso l'evacuazione dei fumi derivati dalla cottura. È quindi consigliato il collegamento all'esterno e l'utilizzo di tutte le componenti del sistema Noise Reduction System.
È comunque possibile utilizzare questi prodotti in versione filtrante e si rende quindi indispensabile l'utilizzo di un filtro carbone opzionale per la filtrazione dei fumi. Per questa necessità abbiamo pensato ad un nuovo filtro carbone ad elevate prestazioni, maggiormente capace di purificare l'ambiente.

The new Noise Reduction System reaches the best performance with the outside connections. We strongly suggest the exhausting version and the use of the NRS® elements. Anyway it is possible to use the hood in recirculation mode but in this case it is required the new optional charcoal filter for air purification. For NRS® hoods it is avaible a new kind of filter with a high purification capacity and efficiency.

Per ottenere il massimo dei risultati in termini di riduzione della rumorosità e massimizzare i benefici del sistema NRS®, Falmec consiglia una corretta installazione di questa famiglia di prodotti.
Nello specifico è importante un corretto collegamento della cappa in versione aspirante e l'utilizzo sia della tubazione che della curva, realizzati nel nostro speciale materiale fonoassorbente, ed in dotazione nel prodotto.

In order to reach the best performances in terms of noise reduction and to maximise the results of our NRS® technology, Falmec suggest that the product is installed to its correct specifications. For maximum efficieny and performance, it is important to ensure that the hood is efficiently ducted, connecting it using the special sound-absorbing piping and curve that are supplied with the hood.

Mirabilia

Nella collezione Mirabilia, le cappe d'arredo diventano un oggetto plurifunzionale che possiede le caratteristiche di una lampada senza perdere nulla della più efficiente funzionalità di una cappa.
Nata per trovare un connubio tra luce, vetro e acciaio, Mirabilia esplora questi materiali in nuove forme e stilemi.
Ottenendo un inedito impatto emozionale.

In the Mirabilia collection, the decorative hoods become multi-functional items with the characteristics of a light, without loosing any hood efficiency.
Designed to merge light, glass and steel, Mirabilia explores these materials in new shapes and styles, to obtain an unprecedented emotional impact.

MIRABILIA LED

Una nuova luce per Mirabilia / A new light for Mirabilia

Falmec, attenta all'ambiente, nelle proprie fasi produttive, nei propri prodotti e componenti propone una nuova versione di Mirabilia. Si aggiunge infatti alla attuale linea di prodotti con luci incandescenti ed alogene la nuova serie Mirabilia LED.
Le luci LED saranno infatti utilizzate sia per l'illuminazione del piano cottura, sia con funzione decorativa all'interno del vetro. I benefici dell'utilizzo di questa tecnologia sono la quasi totale eliminazione dei consumi derivanti dalle fonti luminose. Inoltre i LED bianchi consentono di esaltare maggiormente la purezza dei vetri extra-chiari per un risultato estetico ancor più piacevole e moderno.

Falmec, environment friendly in its production processes, in its products and components proposes the new Mirabilia LED.
To the existing range with incandescent and halogen lights it is added the new Mirabilia LED series. In fact LED lights will be used both for the cooker top lighting, both for the inner ambient illumination.
The benefit of this technology is an almost complete elimination of consumption resulting from light sources. Furthermore the white LED lights can better enhance the purity of the extra-light glasses for a more pleasant and modern effect.

CAPPA CON TELEVISIONE*
Falmec garantisce l'assistenza e la compatibilità dei sistemi di trasmissione per i seguenti Paesi: Italia, Francia, Grecia, Germania, Spagna, Svizzera, Ungheria, Portogallo ed Estonia
CAPPA SENZA TELEVISIONE**
Per stati non precedentemente indicati, il televisore sarà installato direttamente dal cliente finale. L' installazione è comunque facile ed immediata.
A seguire i requisiti minimi per il televisore:
la profondità deve essere compresa tra 79 e 54 mm
larghezza massima 490 mm
formato monitor 16:9
dimensioni monitor 232x410mm
attacco Vesa 100x100 / 75x75 / 50x50 centrato orizzontalmente nella struttura della televisione.
È inoltre preferibile che la televisione sia nera e con la parte audio posizionata sulla parte
inferiore. L'uscita dell'antenna è prevista nella parte superiore della cappa stessa.

HOOD WITH TELEVISION*
Falmec grants the after sales service and the compatibility of the transmission protocol in the following Countries: Italy, France, Germany, Spain, Swiss, Hungary, Portugal, Greece and Estonia.
HOOD WITHOUT TELEVISION**
In the countries not mentioned above, the television will be installed directly by the end user. The installation is really easy and fast.
If you chose the version without television please take note of the following information and
specification for television:
the depth of the television must be between 79 and 54 mm
maximum width 490 mm
monitor format 16:9
monitor size 232x410mm
Vesa support in 100x100 / 75x75 / 50x50 centered horizontally on the TV structure
It is suggested to install a black television with speakers on the lower part.
The exit of the antenna wire is on the top of the hood.

Stratox

LA TECNOLOGIA BREVETTATA STRATOX® CONSENTE LA REALIZZAZIONE DI PANNELLI IN MULTISTRATO. QUESTA INVISIBILE SOLUZIONE TECNICA PERMETTE DI CREARE DELLE CAPPE DALLE INCONFONDIBILI LINEE MINIMAL, CAPACI DI PERSONALIZZARE L'INTERO AMBIENTE CUCINA, NON SOLO PER LA FORMA MA PER IL CONTENUTO TECNOLOGICO CHE POSSIEDONO. LO STRATIFICATO UTILIZZA L'ACCIAIO FASTEEL ANTIMPRONTA.

PATENTED STRATOX TECHNOLOGY ENABLES THE MANUFACTURE OF MULTI-LAYER PANELS. THIS INVISIBLE TECHNOLOGICAL SOLUTION ENABLES CREATION OF HOODS WITH UNMISTAKABLE MINIMUM LINES, CAPABLE OF PERSONALISING AN ENTIRE KITCHEN, NOT JUST DUE TO IT SHAPE, BUT ALSO ITS TECHNOLOGICAL CONTENT. COVERED IN "NO FINGER-PRINTS" FASTEEL.

Silent System

Falmec dedica una particolare attenzione al confort sonoro delle proprie cappe. Il "Silent System" è un accessorio importante che si aggiunge alle camere motore realizzate in materiale fonoassorbente che sono uno standard di tutti i modelli Falmec. Il Pannello Fonoassorbente, di serie sui modelli ad aspirazione perimetrale, completa una dotazione che fa delle cappe Falmec dei perfetti esempi di come sia possibile abbinare bellezza ed eleganza,funzionalità e prestazioni.

Falmec dedicates particular attention to noise control of their range hoods. The "Silent System" is an important component which is added to the motor chamber, made from a noise-absorbing material; it is a standard of all Falmec models. The Noise-absorbing Panel, standard for all perimeter air extraction models, completes the equipment which makes Falmec range hoods perfect examples of how it is possible to unite beauty and elegance with functionality and performance.

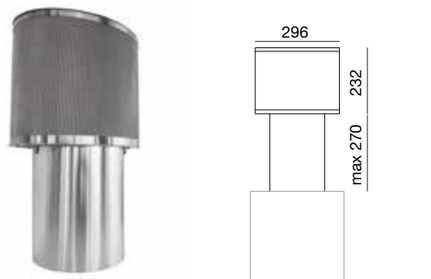
Silenziatore/Convogliatore NRS®
Silent/Conveyer NRS®



Per ottimizzare i flussi dell'aria ed aumentare la silenziosità delle cappa NRS® in versione filtrante è disponibile un nuovo accessorio che permette di ottenere quasi i medesimi risultati in termini di silenziosità di una normale installazione in versione aspirante con tutte le tubazioni "silenziose" in dotazione nel prodotto. Questo accessorio può essere installato direttamente sulla camera motore o sul tubo "silenziato" in dotazione.

In order to improve the air flow in the NRS products, used in re-circulation versions, it is available a new accessory. This product gives to the customer the possibility to reduce the noise level of the air flow where the standard silent pipe (included in the product) is not used and to reach almost

Filtri Carbone
Charcoal Filters

I filtri antiodore vanno installati solo nelle cappe utilizzate in funzione filtrante. I carboni attivi presenti all'interno assorbono gli odori che si creano con la cottura.
Perdono di efficacia con l'uso e si consiglia la sostituzione almeno ogni quattro mesi.

The anti-odour filters should only be installed in the ductless, re-circulating systems. The active carbon inside the filter absorbs cooking odours and smells. The carbon filters are consumed with use and we recommend replacing them every four months.

CONSIGLI UTILI PER L'INSTALLAZIONE
USEFUL ADVICE FOR INSTALLATION

LA SICUREZZA IN CUCINA
A garanzia della sicurezza negli ambienti domestici in cui sono presenti apparecchi di cottura o impianti di riscaldamento alimentati a gas è stata introdotta in Italia la Legge 46/90 che prevede nella normativa tutta una serie di misure preventive per permettere una corretta aerazione dell'ambiente:
- un foro di ingresso, nella parte bassa della parete in comunicazione con l'esterno. Questa apertura consente l'immissione di aria pulita, ricca di ossigeno, per una corretta combustione degli impianti a gas.
- un foro di uscita, nella parte alta della parete esterna, per consentire l'uscita dell'aria viziata. In alternativa a tale foro si può utilizzare una canna fumaria dedicata esclusivamene a tale uso. L'installazione di una cappa Falmec nella versione aspirante consente un efficente ricambio d'aria che migliora la qualità dell'ambiente in cui viviamo. Altro fattore da tener presente è la distanza fra il piano cottura e la cappa. La distanza minima fra i due dispositivi deve essere almeno di 65 cm. Potrebbe essere maggiore se espressamente indicata nelle istruzioni del piano cottura.
LE MODALITÀ DI FUNZIONAMENTO
Esistono due diverse tipologie di funzionamento per le cappe per cucina.
1. la cappa aspirante, che espelle all'esterno i vapori e gli odori della cottura. Questo sistema richiama aria pulita dall'esterno e consente una corretta aerazione della cucina. È la soluzione che Falmec consiglia, in quanto risulta più efficace e garantisce un elevato standard di sicurezza.
2. La cappa filtrante, che aspira l'aria impregnata dai vapori della cottura e la depura attraverso gli appositi filtri, per poi reimmetterla pulita nella stanza. Tale soluzione va adottata esclusivamente qualora non ci sia la possibilità di uno scarico verso l'esterno dei fumi. Per mantenere elevata l'efficacia del sistema filtrante è indispensabile lavare periodicamente i filtri antigrasso e sostituire i filtri antiodore ai carboni attivi.
DISPOSIZIONE TUBI DI ESPULSIONE
L'efficacia d'aspirazione è influenzata anche dalla lunghezza della tubazione, dal numero di curve lungo il percorso e dal diametro del tubo. Maggiore è la lunghezza della tubazione di scarico e maggiore dovrà essere il diametro del tubo impiegato. Falmec consiglia di utilizzare sempre elementi con un diametro minimo di 120 mm e di cercare il percorso più rettilineo verso il foro di uscita. Nella versione aspirante il tubo di uscita dei fumi deve avere un diametro non inferiore a quello del raccordo della cappa. Nei tratti orizzontali il tubo deve avere una leggera inclinazione (10% circa) verso l'alto per convogliare l'aria all'esterno dell'ambiente.
ALLACCIAMENTO ELETTRICO
La cappa prevede un allacciamento elettrico e per tale operazione è meglio rivolgersi a personale qualificato. Il collegamento in ogni caso deve essere eseguito in conformità con le disposizioni di legge in vigore. Sul libretto d'istruzioni che accompagna ciascun modello sono indicate tutte le fasi di montaggio dei dispositivi elettrici.

SAFETY IN THE KITCHEN
In order to guarantee safety within domestic environments in which gas-fired cooking or gas heating appliances are installED, Italy has introduced Law 46/90 and its regulations outline a series of recommendations which allow a proper aeration and ventilation of the environment:
- An inlet vent hole located in the lower part of an exterior wall. This opening allows the intake of clean air or fresh external air, rich in oxygen into the environment, enabling the proper combustion of the gas-applied appliances.
- An outlet vent hole located in the upper part of the external wall so as to allow stale air to leave the environment. Alternatively, this vent may be substituted by a chimney flue exclusively intended for such purpose. Other nations or regions have similar recommendations or even legislation and it is important for homeowners to consult with local building codes. The installation of a Falmec ducted range hood allows air to be changed efficiently which improves the quality of the environment in which you live. Another factor to be taken into consideration is the distance between the top of the gas cooking surface and the bottom of the range hood. The minimum distance between the two devices must be at least 65 cm. This distance may vary with certain gas cookers, please consult the requirements as outlined by the manufacturer of the gas hob.
MODES OF OPERATION
There are two different types of operation with regards to kitchen range hoods.
1. Externally ducted range hood, which expels kitchen fumes and odours outdoors. This system draws in clean air from outdoors and it allows the kitchen to be properly ventilated. This is the solution recommended by Falmec, due to the fact that it is a more efficient solution and it ensures a healthier environment within the kitchen.
2. The ductless or recirculation range hood draws in air impregnated with cooking vapours and cleans it by means of special active carbon filters. This filtered air is then re-circulated back into the kitchen. Such a solution should be chosen only when it is not possible to install a ducted system which vents fumes outdoors. In order to maintain a highly efficient ductless filtering system, it is essential that the greaseproof filters should be periodically washed and the active carbon anti-odour filters be substituted.
OUTLET DUCT CONFIGURATONS
Aspiration efficiency is influenced also by the length of the duct, by the number of elbows along the duct route and the diameter of the ducts. The longer the outlet duct is, the larger the diameter of the duct must be. Falmec always recommends the use of ducting with a minimum diameter of 120 mm to try and use the straightest route leading to the outlet vent, with the shortest run possible. With regards to the external ducted range hoods, the outlet duct must have a diameter no less than that of the range hoods motor. It is recommended that along the horizontal lengths of the duct there must be a slight upward gradient (approximately 10%) in order to allow the air to flow out of the environment.
ELECTRICAL CONNECTIONS
All Falmec range hoods come standard with plug however some installations require a special electrical connection; it is recommended that a qualified electrician be consulted. In any case, the connection must be carried out in compliance with local building codes and legislation. Each phase of the electrical device assembly procedure is shown in the instruction booklet accompanying each model.

GARANZIA
GUARANTEE

La Falmec Spa declina ogni responsabilità relativa ad eventuali inesattezze contenute in questo listino se dovute ad errori di stampa e trascrizione. Il presente listino annulla e sostituisce tutti i precedenti. La Falmec Spa si riserva il diritto di apportare modifica ai prezzi di questo listino in qualsiasi momento in relazione agli aumenti dovuti alle materie prime o quant'altro. La Falmec Spa si riserva il diritto di apportare, in qualsiasi momento e senza preavviso, tutte le modifiche tecniche, estetiche e funzionali ai prodotti che ritiene opportune per il miglioramento dello stesso.
CONDIZIONI GENERALI DI VENDITA E GARANZIA
1- Proposta d'ordine: le proposte d'ordine dovranno sempre essere compilate citando codice, modello, finitura, colore, quantità, prezzo. Ogni proposta d'ordine per essere ritenuta valida, dovrà essere accettata con conferma scritta dalla Falmec Spa.
2- Prezzi: i prezzi riportati sul presente listino si intendono in Euro, al netto di iva. La Falmec Spa si riserva il diritto di apportare modifiche ai prezzi di listino, in base a repentine e imprevedibili variazioni dei costi delle materie prime sul mercato o quant'altro, in ogni momento senza obbligo di preavviso. Il prezzo di listino è comprensivo del costo degli imballi. I costi derivanti da eventuali imballi in legno o imballi speciali sono a carico del cliente.
3- I pagamenti: i pagamenti sono validi solo se effettuati direttamente alla Falmec Spa. I pagamenti diversi devono essere pattuiti di volta in volta con la Falmec Spa e confermati per scritto dalla stessa. Per ragioni amministrative e contabili non si accettano arrotondamenti degli importi risultanti dai nostri documenti. In caso di ritardato pagamento decorreranno immediatamente gli interessi di mora, al saggio previsto dal prime rate maggiorato di 3 punti.
4- Variazioni ordini: gli ordini accettati dalla Falmec Spa per i soli prodotti di serie potranno essere modificati o annullati fino a due giorni lavorativi successivi alla trasmissione dell'ordine.
5- Garanzia: la Falmec Spa riconosce dalla consegna del prodotto, un periodo di garanzia di 24 mesi per tutti i prodotti ad esclusione di quelli per i quali verranno pattuite condizioni diverse all'atto dell'ordine. La garanzia non copre i danni causati da cattiva od errata manutenzione o da un utilizzo del prodotto improprio, da colpa o dolo, così come da cause di forza maggiore. Non è coperta da garanzia il componente o il particolare in legno di ogni prodotto a listino ed in particolare per quanto riguarda, la venatura, il taglio, la porosità e la lucidatura, per la quale non può essere garantita l'identica tonalità delle parti in legno. Tutto il materiale non assemblato dalla Falmec Spa non è coperto da garanzia.
6- Reclami: eventuali reclami o contestazioni dovranno essere inviati per iscritto alla Falmec Spa entro 8 giorni dal ricevimento dei prodotti.
7- Danni causati dal trasporto: il cliente è tenuto a controllare i prodotti all'atto del ricevimento, e far rilevare al vettore gli eventuali danni ascrivibili alla sua opera, questo vale anche per manomissioni o alterazioni degli imballi o colli mancanti, annotando in bolla ogni anomalia, ed inviandone comunicazione direttamente alla Falmec Spa.
8- Resi: non saranno accettati resi se non autorizzati dalla Falmec Spa per iscritto.
9- Modifiche ai prodotti: la Falmec Spa si riserva il diritto di apportare, nel continuo miglioramento dei podotti, qualsiasi modifica tecnica, dimensionale, estetica, che si ritenga opportuna e necessaria, ai prodotti inseriti a listino. Ciò non può costituire per la clientela il diritto a richiedere prodotti diversi da quelli originali o aboliti o modificati, o qual si voglia risarcimento per le modifiche apportate.
10- Foro competente: per ogni eventuale controversia è esclusivamente competente il tribunale di Treviso.
11- Clausola di riservato dominio: Gli acquirenti con rateizzazione di pagamento si intendono effettuati con la clausola di riservato dominio secondo l'articolo 1523 e seguenti del codice civile. Solo con il pagamento dell'ultima rata la proprietà del bene si trasferirà all'acquirente.

Falmec Spa declines all responsibility for any inaccuracies contained in this price list that are due to textual and copying errors. This price-list supersedes and replaces all previous ones. Falmec Spa hereby reserves the right to change the prices of this list at any moment in relation to cost increases of raw materials or/and any further reason. Falmec Spa hereby reserves the right to make - at any moment and without prior notice - all the technical, aesthetic and functional alterations to the products that it believes necessary for their improvement.
GENERAL TERMS OF SALE AND GUARANTEE
1- Order forms: the order forms must always be fiLED in indicating code, model, finish, colour, quantity and price of the items. In order to be considered valid, each order form must be accepted in writing by Falmec Spa.
2- Prices: the prices indicated on this price list are expressed in Euro, VAT excluded. Falmec Spa reserves the right to modify the price list at any moment, without notice, in case of sudden and unexpected variations of the price of raw materials or for any other reason. The price list includes packing costs. The costs of any wooden or special packings are at the customer's expense.
3- Payments: payments are valid only if made directly to Falmec Spa. Different payment terms must be agreed upon from time to time with Falmec Spa and confirmed in writing by Falmec Spa it self. Due to administrative and accounting reasons, no rounding off of the amounts indicated in our documents shall be accepted. In case of delayed payment, the overdue interests, calculated according to the italian prime rate increased of 3%, shall be reckoned starting from the expiry date.
4- Order change: the orders for mass-produced items accepted by Falmec Spa can be modified or cancelLED within two working days from the order date.
5- Guarantee: Falmec Spa guarantees its products for a period of 24 months starting from the date of delivery, exception made for the products for which different conditions are agreed upon on order. The guarantee doesn't cover the damages caused by wrong or incorrect maintenance, by improper use of the products, by fault or malice or by force majeure. The wooden components or details of any product indicated in the price list, in particular as regards vein, cut, porosity, polishing, are not covered by the guarantee either. The products which where not assembLED by Falmec Spa are not guaranteed.
6- Claims: any claim or contestation must be communicated to Falmec Spa in writing within 8 days from receipt of the goods.
7- Damages caused by transport: the customer must check the goods upon receipt and show the forwarding agent any damage which can be ascribed to his work. This applies also for the tampering or alteration of packages or in case of missing packages. Any fault must be indicated in the delivery note and a written communication must be sent directly to Falmec Spa.
8- Sales returns: no return of goods shall be accepted if not authorized in writing by Falmec Spa.
9- Modifications of the products: Falmec Spa reserves the right to modify the products included in the price list as to their technical content, dimensions and appearance, if this is necessary for the improvement of the products themselves. This doesn't grant the customers any right to ask for products different from the original, cancelLED from company's production range or modified, or any reimbursement for the changes which have been introduced.
10- Competent Court: the only competent court for any claim is the Court of Treviso.
11- Retention of title: purchases with payment by instalments can be carried out under retention of title, according to Art. 1523 and following articles of the Italian Civil Code. The property of the goods shall be transferred to the purchaser only upon payment of the last instalment.
